

We will help you be safe

By Azriyel crow

Welcome to your brand new job
Here you have everything you need
Take a keyboard to help you out
Disregard the shrinking woods
We will help you be safe

Come back here again and again
Twelve-hour days, we must be productive
Disregard the boxes in the hall
Don't fear replacement
We will keep you safe

Take a new coffee machine
a new monitor, a new desk
We must avoid workplace apathy
Disregard the installation of cameras
It's to keep us safe

We will now be broadcasting news
The canvas is the side of our building
We will be telling those below to fear
Fear of others will stimulate the masses
It will keep us safe

Everything said about us was a lie
You work here, you're not depressed
Disregard rumors, anyone we catch spreading them will be detained
The only fear you need is what we give you
Through your fear, we are safe

Dear valued employees
We've been receiving complaints
All of your pay will be cut by a quarter
It's for a company party you will never see
There is no fear, we are safe

We've been receiving more complaints
All of you will soon be fired
Replaced by machines
They do not sleep, eat, or complain
It's to keep me safe
