

Are the Robots Here?

Robots are here, and here to stay
Artificial intelligence, not so strange
Amazing the roles robots play
As we look at the past but forward to today

Robots are here, and here to stay
Giant colorful arms working with precision
Buzzing, humming, working in a rhythmical way
Creative minds with the robotic design vision

Robots are here, and here to stay
With methodical movements
And precision to detail they display
Watchful eyes, thinking of the next improvements

Robots are here, and here to stay
Programmers, engineers, design the future
Artificial intelligence leading the way
Creativity continues this new adventure

Yes, Robots are here, and here to stay
Moving, working, and creating positive change
